Company Profile

Excel has become a trendsetter in the LED industry by offering quality, custom and durable products to customers across the region. We were founded on our revolutionary quality products to Indian market, EX Series, which fulfilled a need for the always touring market. Since then, Excel has developed a full line of EX series permanent install and rental/staging products. In addition to our current line of products, we offer a solutions-based approach often designing new products based on client need. Knowledge gained from the demanding market has enabled us to design reliable, cost-effective solutions for unique, permanent installations for any LED display need. Through skillfully crafted designs, Excel has stayed on the top for innovations, serving many industries and being recognized as European standard process manufacturer.

INDIAN BASED COMPANY

Excel is an Indian based company. We strive to support our customers every step of that way and that allows us to guarantee our work, support and service our clients more effortlessly.

SUPPORT AND SERVICE

Knowing that you and your products are at the forefront of our company's mind after the job is done is our key to success. We offer industry leading warranty programs. support and service that give you confidence in your choice to choose Excel.

OUR MISSION

Creating a customer-driven solutions in the world of professional LED video solutions. We are dedicated towards delivering high quality products at an unmatched prices across the region.

IDEAS THAT SUPPORT OUR MISSION

- Our First priority is our customers; they are the reason we are in business.
- Identify a competitive edge in service, product and quality.
- Deliver what we promise
- Deploying talented & skilled team, as our employees are the ones that make our company work each and every day.
- Every client is important to us, and you will be treated like a top tier customer.

Advertising Display Solution

LED SCREENS WITH LARGER VISIONS

With the rapid development of domestic business and commercial environments, each industry has an increasing demand for advertising. Digital, networked and informationized multimedia advertising displays have become an attraction in the media market. Advertising displays can use multimedia such as images, text, videos, plug-ins (like weather, exchange rate, etc.) for publicity and now are widely used in subways, bus stations, airports, railway stations, gas stations, exhibitions, shopping malls, large buildings, restaurants, schools, government organizations, etc. The web-based VNNOX platform is not only suitable for LED advertising displays but also can be used for LED advertising displays, allowing for one screen with different content displayed, multi-screen mosaic, cluster publishing, remote monitoring, etc. and greatly enhancing the value of displays.
